

DECORATIVE METAL PANELS

Decori specialise in laser cutting beautiful designs in metal. We have a vast range of designs to choose from on our website.
www.decori.co.uk/design

All Decori panels are made of high quality steel, they are treated to prevent rust. We also provide brushed and mirror stainless steel finishes. Panels are suitable for indoor and outdoor use, the exception being corten (weathering steel which is more suitable for outdoor use).

We offer our wall art in a range of different materials including Zintec, Aluminum, Stainless and Corten. We also produce a full colour powder coating service, matching to your perfect colour and finish.

There are 2 popular sizes available as above, but we are able to cater for any size up to a maximum of 2.8m x 1.3m. Wall mounted panels come in a standard 1.2mm, unless stated otherwise. The panels can be adapted to hang easily portrait or landscape.

The bespoke service for that unique project is highly sought after. We have a rendering facility to enable you to see your panel in situ before you order.
